Title : On the Toxic Manifestations During the Use of the Phenothiazine Derivatives

Orig Pub : S"vrem. med., 1957, 8, No 10, 47-55

Abstract : In connection with the cases of the development of hepatitis, as well as of the syndrome of Parkinsonism, under the influence of largactyl [chlorpromazine], the problems of the pathogenesis and pathophysiological changes in the above complications are being discussed. EEG data in extrapyramidal disturbances reveal dynamic disorders of the interaction between cortex and subcortical formations (weakening of the inhibitory and regulating function of the cortex associated with activation of some extrapyramidal mechanisms) which are at the basis of the syndrome of Parkinsonism induced by largactyl.

Title : The Extraction Dynamics in the Maceration
Techniques
Orig Pub. : Farmatsiya (Bulg.), 1958, 8, No 2, 28-29
Abstract : Extraction processes, in general, are based on
distribution and diffusion. Among the extr-
action methods employed the maceration tech-
nique, conducted in a state of relatively
static phase conditions, is the most unrealis-
tic one since it yields very small quantities
of the extracted material (medicinal prepara-
tion). This is explained by insufficient inter-

 TITLE : Investigation of the Effect of Cracked Tars on
 the Lowering of Pour Point of Diesel Oil.
 ORIG. PUB. : Petrol si gasa, 1958, 9, No 10, 467-468
 ABSTRACT : In order to improve pour point characteristics
 of diesel oil it is proposed to add 2.0-2.2% of
 cracked tars. In so doing the pour point of diesel
 is lowered.
